DETAILED ACTION

Election/Restrictions

1.Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, 14 and 15, drawn to a process for producing plane parallel platelets.

Group II, claim(s) 8-13 and 16, drawn to an apparatus for producing plane parallel platelets.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: US Patent 6,376,018 to Kittler, Jr discloses the instant apparatus and hence the two groups cannot share the same inventive concept.

A telephone call was made to Mr. Armstrong on July 23, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
